Re: **Surepath Solutions Inc achieves Microsoft Gold Certified Partner status**

Surepath Solutions Inc has been awarded Microsoft Gold Certified Partnership status for Microsoft Dynamics ERP systems and Data Platforms. This represents the highest level of technical expertise attainable by Microsoft Partner organizations.

To achieve Gold Partner status, Surepath Solutions was required to provide excellent customer references and demonstrate deep technical competency implementing Microsoft Dynamics NAV, as well as traditional Microsoft platform technologies. The Microsoft Gold accreditation is only awarded to partners that have a proven level of competence for their people, processes and services. In addition, Microsoft requires partners to re-qualify on an annual basis to ensure service levels and expertise remain consistently high.

"We are extremely pleased to have attained Gold Certified Partner status in the Microsoft Partner Program. This allows us to clearly promote our expertise and relationship with Microsoft to our customers," said Darcy Quast, President, Surepath Solutions Inc. "The benefits provided through our Gold Certified Partner status will allow us to continue to enhance the offerings that we provide for customers."

"Customers are looking for partner companies that can bridge the gap between their business demands and technology capabilities," said Allison Watson, vice president of the Worldwide Partner Sales and Marketing Group at Microsoft Corp. "They need to trust in a company that can act as an expert adviser for their long-term strategic technology plans. Microsoft Gold Certified Partners, which have certified expertise and direct training and support from Microsoft, can build a positive customer experience with our technologies. Today, Microsoft recognizes Surepath Solutions Inc as a new Gold Certified Partner for demonstrating its expertise providing customer satisfaction using Microsoft products and technology."

"Attaining Gold Certified Partner status is the outcome of a continual focus on meeting and exceeding our customers' expectations," said Quast "Our concentration on providing solutions based on Microsoft Dynamics NAV and Microsoft technology has served us and our clients very well. We look forward to continuing a valued partnership with Microsoft's team of professionals."
